7. PERFORMANCE AND EFFECT ON VALUE OF INVESTMENT**(i) PERFORMANCE OF FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT** (*Structured Notes only*)

The value of the Notes, the payment of a redemption amount to a Noteholder on the date of redemption will depend on the performance of the underlying index(es), on the relevant valuation date(s).

The value of the Notes is linked to the positive or negative performance of the underlying index.

In the case of open end Notes, the duration of the Notes is dependent on an optional redemption, elected by the Issuer.

The possibility of an optional redemption by the Issuer, on a predetermined date, is likely to have a negative effect on the market value of the Notes. Potential investors should consider the reinvestment risk in light of other investments available at the time of the redemption. If there is no secondary market, there might be no possibility for the investors to sell the Notes. Furthermore, this optional redemption at the only discretion of the Issuer could prevent the Noteholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.

The terms and conditions of the Notes may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Notes may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying instrument(s), the terms and conditions of the Notes allow the Issuer to substitute the underlying instrument(s) by new underlying instrument(s), cease the exposure to the underlying index and apply a reference rate to the proceeds so obtained until the date of redemption of the Notes, postpone the date of redemption of the Notes, early redeem the Notes on the basis of the market value of these Notes, or deduct from any due amount the increase cost of hedging, and in each case without the consent of the Noteholders.

Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on the Notes are calculated by reference to certain underlying(s), the return of the Notes is based on changes in the value of the underlying(s), which may fluctuate. Potential investors should be aware that these Notes may be volatile and that they may receive no interest and may lose all or a substantial portion of their principal.

During the lifetime of the Notes, the market value of these Notes may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.

The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.

(ii) PERFORMANCE OF RATE[S] OF EXCHANGE AND EXPLANATION OF EFFECT ON VALUE OF INVESTMENT (*Dual Currency Notes only*)

This trend is expected to carry over into 2015, which is shaping up to deliver a weaker-than-expected global economic recovery amid myriad uncertainties both on the geopolitical front and on the commodity and forex markets.</p> <p>The euro zone is struggling to return to more dynamic growth, thus slowing the reduction of public deficits. Interest rates should remain at record lows, but the deflationary risk should be kept under control by the intervention of the ECB which has announced the implementation of a more accommodative monetary policy and the use of its balance sheet to support growth. The depreciation of the euro and falling oil prices should help boost exports and stimulate domestic demand. The US economy should stay on a positive track and the Fed is expected to begin tightening its monetary policy mid-year. Emerging countries have entered a phase of more moderate growth, in particular China. Russia's economy is struggling with the consequences of the Ukrainian crisis coupled with the drop in commodity prices.</p>

From a regulatory standpoint, 2014 saw the implementation of the Banking Union. The European Central Bank took the helm of the Single Supervisory Mechanism, overseeing some 130 euro zone banks, with the aim of strengthening the banking system, restoring the confidence of economic operators, harmonising banking supervision rules and reducing the link between banks and their national authorities.

In terms of regulatory ratios, the Group can already meet the new requirements.

Section D – Risks		
D.2	Key information on the key risks that are specific to the issuer and the guarantor	<p>The Group is exposed to the risks inherent in its core businesses.</p> <p>The Group's risk management focuses on the following main categories of risks, any of which could materially adversely affect the Group's business, results of operations and financial condition:</p> <p>Credit and counterparty risk (including country risk): risk of losses arising from the inability of the Group's customers, issuers or other counterparties to meet their financial commitments. Credit risk includes counterparty risk linked to market transactions (replacement risk) and as well as securitisation activities.</p> <p>Market risk: risk of a loss of value on financial instruments arising from changes in market parameters, volatility of these parameters and correlations between them.</p> <p>Operational risks: risk of losses or sanctions due to inadequacies or failures in internal procedures or systems, human error or external events;</p> <p>Structural interest and exchange rate risk: risk of loss or of write-downs in the Group's assets arising from variations in interest or exchange rates.</p> <p>Liquidity risk: risk of the Group not being able to meet its cash or collateral requirements as they arise and at a reasonable cost.</p> <p>The Guarantee constitutes a general and unsecured contractual obligation of the Guarantor and no other person, any payments on the Notes are also dependent on the creditworthiness of the Guarantor.</p> <p>Prospective investors in Notes benefiting from the Guarantee should note that in case of payment default of an Issuer the entitlement of the Noteholder will be limited to the sums obtained by making a claim under the Guarantee, and the relevant provisions of the Guarantee and they shall have no right to institute any proceeding, judicial or otherwise, or otherwise assert a claim against the Issuer and, in relation to Secured Notes only, from the sums obtained following enforcement of the relevant Pledge Agreement.</p> <p>The Guarantee is a payment guarantee only and not a guarantee of the performance by the relevant Issuer or any of its other obligations under the Notes benefiting from the Guarantee.</p> <p>The Guarantee may cover only part of the relevant Issuer's payment obligations under the relevant Series of Notes. In such a case, Noteholders may retain the risk that payments under the Guarantee are less than the amounts due by the Issuer under the Notes.</p> <p>Société Générale will act as issuer under the Programme, as the Guarantor of the Notes issued by the Issuer and also as provider of hedging instruments to the Issuer.</p>

		<p>As a result, investors will be exposed not only to the credit risk of the Guarantor but also operational risks arising from the lack of independence of the Guarantor, in assuming its duties and obligations as the Guarantor and provider of the hedging instruments.</p> <p>The potential conflicts of interests and operational risks arising from such lack of independence are in part intended to be mitigated by the fact that different divisions within the Guarantor will be responsible for implementing the Guarantee and providing the hedging instruments and that each division is run as a separate operational unit, segregated by Chinese walls (information barriers) and run by different management teams.</p> <p>The Issuer and the Guarantor and any of their subsidiaries and/or their affiliates, in connection with their other business activities, may possess or acquire material information about the underlying assets. Such activities and information may cause consequences adverse to Noteholders.</p> <p>The Issuer and the Guarantor and any of their subsidiaries and/or their affiliates may act in other capacities with regard to the Notes, such as market maker, calculation agent or agent. Therefore, a potential conflict of interests may arise.</p> <p>In connection with the offering of the Notes, the Issuer and the Guarantor and/or their affiliates may enter into one or more hedging transaction(s) with respect to a reference asset(s) or related derivatives, which may affect the market price, liquidity or value of the Notes.</p>
D.6	<p>Key information on the key risks that are specific to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p>	<p>In the case of open end Notes, the duration of the Notes is dependent on an optional redemption, elected by the Issuer. The possibility of an optional redemption by the Issuer, on a predetermined date, is likely to have a negative effect on the market value of the Notes. Potential investors should consider the reinvestment risk in light of other investments available at the time of the redemption.</p> <p>Furthermore, this optional redemption at the sole discretion of the Issuer could prevent the Noteholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.</p> <p>The terms and conditions of the Notes may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Notes may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying index, the terms and conditions of the Notes allow the Issuer to substitute the underlying index by new underlying index(es), cease the exposure to the underlying index(es) and apply a reference rate to the proceeds so obtained until the date of redemption of the Notes, postpone the date of redemption of the Notes, early redeem the Notes on the basis of the market value of these Notes, or deduct from any due amount the increase cost of hedging, and in each case without the consent of the Noteholders.</p> <p>During the lifetime of the Notes, the market value of these Notes may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.</p> <p>The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.</p>

Section E – Offer		
E.2.b	<p>Reasons for the offer and use of proceeds</p>	<p>The net proceeds from each issue of Notes will be applied for the general financing purposes of the Société Générale Group, which include making a profit.</p>
E.3	<p>Description of the terms and conditions of the offer</p>	<p>Not Applicable. The Notes are not subject to a public offer in the European Economic Area.</p>

Tale tendenza continuerà probabilmente anche nel 2015, anno che si sta preparando a offrire una ripresa a livello globale inferiore alle attese, tra mille incertezze sia di natura geopolitica che in termini di mercati delle materie prime e dei cambi.</p> <p>La zona Euro sta faticando a ritornare a una crescita più dinamica, rallentando così la riduzione del disavanzo pubblico. I tassi di interesse dovrebbero rimanere ai livelli minimi, ma il rischio di deflazione dovrebbe essere tenuto sotto controllo grazie all'intervento della BCE che ha annunciato l'adozione di una politica monetaria più accomodante e l'utilizzo del proprio bilancio per sostenere la crescita. Il deprezzamento dell'Euro e il calo dei prezzi del petrolio dovrebbero contribuire a migliorare le esportazioni e a stimolare la domanda interna. L'economia USA dovrebbe continuare a rimanere positiva e si prevede che la Fed avvierà le proprie attività di stretta monetaria verso metà anno. I paesi emergenti stanno vivendo una fase di crescita più moderata, specialmente per quanto riguarda la Cina. L'economia russa si trova ad affrontare le conseguenze della crisi in Ucraina e del crollo dei prezzi delle materie</p>

Il rischio di credito comprende il rischio di controparte collegato alle operazioni di mercato (rischio di sostituzione) oltre alle attività di cartolarizzazione.</p> <p>Rischio di mercato: rischio di perdita di valore in relazione agli strumenti finanziari risultante da variazioni dei parametri di mercato, dalla volatilità di detti parametri e dalle correlazioni tra tali fattori.</p> <p>Rischi operativi: rischio di perdite o sanzioni a seguito di inadeguatezze o mancanze riscontrate nelle procedure o nei sistemi interni, errori umani o eventi esterni;</p> <p>Rischio strutturale di tasso di interesse e di cambio: rischio di perdite o deprezzamenti dell'attivo del Gruppo a seguito di variazioni dei tassi di interesse o dei cambi.</p> <p>Rischio liquidità: rischio che il Gruppo non sia in grado di soddisfare, al loro manifestarsi, le proprie esigenze di liquidità o di garanzia a costi ragionevoli.</p> <p>La Garanzia costituisce un obbligo contrattuale generale e non garantito del Garante e di nessun altro soggetto; gli eventuali pagamenti relativi alle Notes dipende inoltre dall'affidabilità creditizia del Garante.</p> <p>Si richiama l'attenzione di coloro che desiderano investire nelle Notes che beneficino della Garanzia, sul fatto che, in caso di mancato pagamento da parte di un Emittente, gli importi cui hanno diritto i Portatori delle Notes si limiteranno agli importi ottenuti tramite un'apposita azione da promuoversi ai sensi della Garanzia e delle disposizioni rilevanti della Garanzia, e non avranno alcun diritto di istituire alcun procedimento, di natura giudiziaria o altrimenti, né di avanzare alcuna pretesa nei confronti dell'Emittente e, in relazione alle sole Notes Garantite, agli importi ottenuti a seguito dell'escussione del relativo Atto di Pegno.</p> <p>La Garanzia è una mera garanzia di pagamento e non una garanzia relativa alla performance dell'Emittente rilevante né ad alcuno degli altri obblighi dello stesso ai sensi delle Notes, che beneficino della Garanzia. La Garanzia può coprire solo parte degli obblighi di pagamento del relativo Emittente ai sensi della rispettiva serie di Notes. In tal caso, i Portatori delle Notes potrebbero essere comunque esposti al rischio che i pagamenti ai sensi della Garanzia siano inferiori agli importi dovuti dall'Emittente ai sensi delle Notes.</p> <p>I potenziali conflitti di interesse e i rischi operativi derivanti da tale mancanza di indipendenza dovrebbero in parte essere mitigati dal fatto che all'interno del Garante, l'implementazione della Garanzia e la fornitura di strumenti di copertura compente a divisioni differenti, ognuna gestita come unità operativa distinta, segregata da barriere informative (i cosiddetti Chinese Walls) e gestita da team diversi.</p> <p>L'Emittente e il Garante, e qualunque delle rispettive controllate e/o affiliate, in relazione alle altre rispettive attività commerciali, potrebbero essere in possesso di, o acquisire, informazioni rilevanti in merito alle attività sottostanti. Tali attività e informazioni potrebbero comportare conseguenze negative per i Portatori delle Notes.</p> <p>L'Emittente e il Garante e qualunque delle rispettive controllate e/o affiliate potrebbero operare in altre vesti in relazione alle Notes, ad esempio in qualità di market maker, agente per il calcolo o agente. Pertanto, potrebbero verificarsi potenziali conflitti di interesse.</p> <p>In relazione all'offerta delle Notes, l'Emittente e il Garante e/o le rispettive affiliate potrebbe stipulare uno o più operazioni di copertura con riguardo a uno o più attività di riferimento o relativi derivati, suscettibili di incidere sul prezzo di mercato, sulla liquidità o sul valore delle Notes.</p>
D.6	Principali informazioni relative ai principali rischi specifici dei titoli e avvertenze in merito ai rischi di perdita del valore di tutto o parte del proprio investimento	<p>In caso di Notes senza scadenza, la durata delle Notes dipende dal rimborso opzionale, esercitato dall'Emittente. La possibilità di un rimborso opzionale da parte dell'Emittente, in una data predeterminata, probabilmente avrà un impatto negativo sui valori di mercato delle Notes. I potenziali investitori devono considerare il rischio di reinvestimento alla luce degli altri investimenti disponibili al momento del rimborso.</p> <p>Inoltre, questo rimborso opzionale a discrezione dell'Emittente potrebbe</p>

	da parte degli investitori	<p>impedire al Portatore delle Notes di beneficiare della performance degli strumenti sottostanti su tutto il periodo inizialmente immaginato.</p> <p>I termini e le condizioni delle Notes possono prevedere disposizioni ai sensi delle quali il verificarsi di determinate turbative di mercato potrebbe comportare ritardi nel regolamento delle Notes ovvero determinate modifiche. Inoltre, nel caso di eventi che interessino gli strumenti sottostanti, i termini e le condizioni delle Notes consentono all'Emittente di sostituire gli strumenti sottostanti con strumenti sottostanti nuovi, cessare l'esposizione alle attività sottostanti e applicare un tasso di riferimento ai proventi così ottenuti fino alla data di rimborso delle Notes, prorogare la data di rimborso delle Notes, rimborsare anticipatamente le Notes sulla base del relativo valore di mercato, o detrarre da qualunque importo dovuto il maggiore costo di copertura, e in ciascun caso senza in consenso dei Portatori delle Notes.</p> <p>Nel corso della vita delle Notes, il valore di mercato delle stesse potrebbe risultare inferiore al capitale investito. Inoltre, in caso di insolvenza da parte dell'Emittente e/o del Garante potrebbe verificarsi la perdita totale del capitale investito.</p> <p>Si richiama l'attenzione degli investitori sul fatto che potrebbero incorrere nella perdita totale o parziale del proprio investimento.</p>
