FX(i) means, for any Valuation Date(i), the spot exchange rate as of the FXSourceFixingTime to convert the BaseCurrency into the LeveragedStrategyCurrency in respect of such Valuation Date(i), as published by the FXSource, or any successor thereto. If no such rate is available on such Valuation Date(i), FX(i) shall be the first available spot exchange rate as of the FXSourceFixingTime to convert the BaseCurrency into the LeveragedStrategyCurrency following such day, as published by the FXSource, or any successor thereto.

Ratio or Ratio(i) means, for each Valuation Date(i), the value of Ratio(i) in respect of each Warrant on such Valuation Date(i), which shall be the value of Ratio(i) on the Valuation Date(i-1) unless adjusted by the Calculation Agent in accordance with the following provisions.

$$C(i) / IV(i) > \text{RatioResetThreshold}$$

then the Calculation Agent shall adjust the value of Ratio(i) in respect of such Valuation Date(i). The Calculation Agent may also, on any Valuation Date(i) from, but excluding, the Initial Valuation Date to, and including, the Final Valuation Date, elect in its sole discretion to adjust the value of Ratio(i) in respect of such Valuation Date(i). If the Calculation Agent adjusts the value of Ratio(i), it shall do so in accordance with the following formula:

$$\text{Ratio}(i) = (\text{Ratio}(i-1) \times \text{LSCL}(i) - C_{\text{BEFORE}}(i) \times (\text{LSCL}(0) / \text{InitialValue})) / \text{LSCL}(i)$$

The initial value of Ratio shall be equal to Ratio(0) = 1.

The value of **Ratio(i)** applicable from time to time shall be made available by the Issuer on the website www.warrants.it.

LSCL(i)

means, for each Valuation Date(i), the Leveraged Strategy Closing Level as of such Valuation Date(i), as such level may be adjusted in accordance with the provisions of "Extraordinary Strategy Adjustment for Performance Reasons" at Condition 3.2.2.5.4 of the Additional Terms and Conditions relating to One Delta, Fixed Leverage and Turbo Warrants.

Commission(i), Commission or C(i)

means, in respect of each Valuation Date(i):

if (i) is the Initial Valuation Date or a day on which the value of Ratio(i) has been adjusted in accordance with the definition of "Ratio or Ratio(i)" herein:

Leveraged Strategy

Description of the Leveraged Strategy

The strategy to which the performance of the Warrant is linked is the Leveraged Strategy which consists of leveraged exposure to the Underlying with a Leverage factor "**Leverage**" and a hypothetical money market instrument.

The notional exposure of the Leveraged Strategy to the Underlying is revised on each Valuation Date in order to take into account the Leveraged Strategy Closing Level as of the previous Valuation Date, as further described hereinafter.

Subject to the occurrence of an Intraday Restrike Event (following which the Leveraged Strategy Closing Level will be determined in accordance with Condition 3.2.2.5.4 of the Additional Terms and Conditions relating to One-Delta, Fixed Leverage and Turbo Warrants), for each Valuation Date(i), the **Leveraged Strategy Closing Level** as of such Valuation Date(i) is calculated in accordance with the following formulae:

on Valuation Date(0):

$$\text{LSCL}(0) = \text{LSCLInitial}$$

on each subsequent Valuation Date(i):

$$\text{LSCL}(i) = \text{Max}(\text{LSCL}(i-1) \times (1 + \text{Leverage} \times ((\text{Price}(i) / \text{AdjPrice}(i-1)) - 1) + (1 - \text{Leverage}) \times \text{Rate}(i-1) \times \text{ACT}(i-1, i) / \text{DayCountBasisRate}), 0)$$

Subject to the occurrence of an Intraday Restrike Event (following which the Leveraged Strategy Level will be determined in accordance with Condition 3.2.2.5.4 of the Additional Terms and Conditions relating to One-Delta, Fixed Leverage and Turbo Warrants), for each Valuation Date(i) and each Calculation Time(v), the **Leveraged Strategy Level** as of such Calculation Time(v) is calculated in accordance with the following formula:

$$\text{LSL}(i, v) = \text{Max}(\text{LSCL}(i-1) \times (1 + \text{Leverage} \times ((\text{Price}(i, v) / \text{AdjPrice}(i-1)) - 1) + (1 - \text{Leverage}) \times \text{Rate}(i-1) \times \text{ACT}(i-1, i) / \text{DayCountBasisRate}), 0)$$

For the purposes of determining LSCL(i) on a Valuation Date immediately following an Intraday Restrike Event Reference Day, references to (i-1) in the formula of LSCL(i) above shall be deemed to be references to (i') (as defined in Condition 3.2.2.5.4 of the Additional Terms and Conditions relating to One-Delta, Fixed Leverage and Turbo Warrants).

Specific Definitions relating to the Leveraged Strategy

AdjPrice(i-1)

is determined, for each Valuation Date(i), according to the following formula:

Price(i-1)

CashRate or CashRate(i)

means, for each Valuation Date(i):

- (1) the level of the RateOvernight for such Valuation Date(i); or
- (2) the last available level displayed of RateOvernight, if a level of RateOvernight dated as of such Valuation Date(i)

in both cases as determined by the Calculation Agent provided that if in the case of (2) above RateOvernight is not displayed on the RateOvernightScreenPage (or, if applicable, any successor service or page used by the Calculation Agent for the purpose of ascertaining such rate) for a period of more than 7 Valuation Dates and such rate is, in the opinion of the Calculation Agent, reasonably expected to be discontinued (such rate then being the "**Discontinued Rate**") then the Calculation Agent shall determine CashRate(i) (a) by selecting a successor rate for such Discontinued Rate which offers similar economic characteristics to the Discontinued Rate or, if the Calculation Agent determines that no such successor rate exists, (b) on the basis of the cost that Société Générale would charge or be charged to borrow cash in the LeveragedStrategyCurrency on an overnight basis.

Leveraged Strategy Closing Level or LSCL(i)

means, for any Valuation Date(i), the Closing Level of the Leveraged Strategy as of such day (i), as such level may be adjusted in accordance with the terms of condition 3.2.2.5.4 of the Additional Terms and Conditions relating to One-Delta, Fixed Leverage and Turbo Warrants.

Leveraged Strategy Level or LSL(i,v)

means, for any Valuation Date(i) and any Calculation Time(v), the latest level of the Leveraged Strategy as of such Calculation Time(v), as such level may be adjusted in accordance with the terms of condition 3.2.2.5.4 of the Additional Terms and

Conditions relating to One-Delta, Fixed Leverage and Turbo Warrants.

Rate or Rate(i)

means, for each Valuation Date(i), an annual rate calculated as of such day in accordance with the following formula:

$$\text{Rate}(i) = \text{CashRate}(i) + \% \text{SpreadLevel}(i)$$

Calculation Time

means with respect to the Leveraged Strategy, any time between the scheduled opening time of the Exchange and FixingTime provided that the relevant data is available to enable the Calculation Agent to determine the Leveraged Strategy Level.

Extraordinary Strategy Adjustment for Performance Reasons

Description

If the Calculation Agent determines that an Intraday Restrike Event has occurred at a Calculation Time(v) during a Valuation Date(i), an adjustment (an **Extraordinary Strategy Adjustment for Performance Reasons**) shall take place during such Valuation Date(i) in accordance with the following provisions.

The real time calculation of the Leveraged Strategy shall be suspended during the Intraday Restrike Event Observation Period and resume in accordance with Condition 3.2.2.5.4 of the Additional Terms and Conditions relating to One Delta, Fixed Leverage and Turbo Warrants within 15 minutes following the end of such Intraday Restrike Event Observation Period (the point of such resumption being the **Calculation Resume Time** and the day on which such resumption occurs being the **Calculation Resume Day** or **CRD**). Should the end of the Intraday Restrike Event Observation Period occur less than 15 minutes before the FixingTime on the Intraday Restrike Event Reference Day, the Calculation Resume Time shall be the FixingTime which immediately follows the end of the Intraday Restrike Event Observation Period.

On each Calculation Resume Day, from the Calculation Resume Time, LSCL(CRD) and LSL(CRD,v) will be determined as follows:

For each Calculation Time(v) during such Calculation Resume Day following the end of the

Intraday Restrike Event Observation Period, the Leveraged Strategy is calculated according to the following formula:

$$\text{LSL}(\text{CRD},v) = \text{LSL}(i',V_{\text{REF}}(v)) \times (1 + \text{Leverage} \times ((\text{Price}(\text{CRD},v) / \text{AdjPrice}(i')) - 1) + (1 - \text{Leverage}) \times \text{Rate}(i') \times \text{ACT}(i',\text{CRD}) / \text{DayCountBasisRate})$$

and at the FixingTime of such Calculation Resume Day:

$$\text{LSCL}(\text{CRD}) = \text{LSL}(i',V_{\text{REF}}(v)) \times (1 + \text{Leverage} \times ((\text{Price}(\text{CRD}) / \text{AdjPrice}(i')) - 1) + (1 - \text{Leverage}) \times \text{Rate}(i') \times \text{ACT}(i',\text{CRD}) / \text{DayCountBasisRate})$$

Specific Definitions

(i') means the Intraday Restrike Event Reference Day which corresponds to the Intraday Restrike Event immediately preceding the Calculation Time(v).

AdjPrice(i') is determined according to the following formula:

$$\text{AdjPrice}(i') = \text{Price}(i',V_{\text{REF}}(v))$$

Intraday Reference Level means, in respect of Valuation Date(i) and a Calculation Time(v), the Underlying level as of (1) the last Intraday Restrike Event Reference Time preceding and excluding such Calculation Time(v) or (2) if no Intraday Restrike Event has occurred on such day, the closing level of the Underlying on the immediately preceding Valuation Date.

Intraday Restrike Event means, in respect of a Valuation Date(i), the decrease at a Calculation Time(v) of the Underlying level below the DailyRestrikePercentage of the relevant Intraday Reference Level at such Calculation Time.

Intraday Restrike Event Observation Period means in respect of an Intraday Restrike Event, the period starting on and excluding the Intraday Restrike Event Time and finishing on and including the time falling 15 minutes after the Intraday Restrike Event Time.

Where, during such 15 minute period, the Calculation Agent determines that (1) the level of the Underlying is not disseminated by the Index Sponsor or (2) the Exchange or the Related Exchange is not open for continuous trading, the Intraday Restrike Event Observation Period will be extended to the extent necessary until (1) the level of the Underlying is calculated and disseminated by

the Index Sponsor and (2) the Exchange and the Related Exchange are open for continuous trading for an aggregate period of 15 minutes.

If the Intraday Restrike Event Observation Period would not end by the FixingTime: (1) such day will not be a Valuation Date for the purposes of determining any element of the Leveraged Strategy, except (a) for the purpose of calculating $LSL(i',V_{REF}(v))$ and $AdjPrice(i')$ (and the constituent parts thereof) corresponding to the applicable Intraday Restrike Event and (b) for the purpose of calculating $LSL(i',V_{REF}(v))$ and $AdjPrice(i')$ (and the constituent parts thereof) with respect to any previous Intraday Restrike Event that has occurred on such day, if any; and (2) such Intraday Restrike Event Observation Period shall be extended to the following Valuation Date to the extent necessary until the Calculation Agent determines that (a) the level of the Underlying is calculated and disseminated by the Index Sponsor and (b) the Exchange and the Related Exchange are open for continuous trading for an aggregate period of 15 minutes.

For the purpose of determining the Intraday Restrike Event Observation Period only, the Exchange shall not be considered to be open for continuous trading during its closing auction period (as provided under the rules of the Exchange).

Intraday Restrike Event Reference Day

means, in respect of an Intraday Restrike Event Observation Period, the day on which the Intraday Restrike Event Reference Time occurs.

Intraday Restrike Event Reference Time

means, in respect of an Intraday Restrike Event Observation Period, the Calculation Time on which the Leveraged Strategy Level reaches its lowest value during such period.

Intraday Restrike Event Time

means in respect of an Intraday Restrike Event, the Calculation Time on which such event occurs.

$LSL(i',V_{REF}(v))$

is calculated in accordance with the following formulae:

(1) where, in respect of an Intraday Restrike Event, one or more Intraday Restrike

Event Times have previously occurred with an Intraday Restrike Event Reference Time occurring on (i'), then (with the latest Intraday Restrike Event Reference Time, immediately preceding $V_{REF}(v)$, being "v1"):

$$LSL(i', V_{REF}(v)) = LSL(i', v1) \times (1 + \text{Leverage} \times ((\text{Price}(i', V_{REF}(v)) / \text{Price}(i', v1)) - 1))$$

Where $LSL(i', v1)$ is determined in accordance with Condition 3.2.2.5.4 of the Additional Terms and Conditions relating to One Delta, Fixed Leverage and Turbo Warrants but with " $V_{REF}(v)$ " replaced by "v1".

(2) in circumstances other than those set out in (1):

$$LSL(i', V_{REF}(v)) = LSLREF(i(REF)) \times (1 + \text{Leverage} \times ((\text{Price}(i', V_{REF}(v)) / \text{AdjPrice}(i(REF))) - 1) + (1 - \text{Leverage}) \times \text{Rate}(i(REF)) \times (\text{ACT}(i(REF), i') / \text{DayCountBasisRate}))$$

i(REF)

means the latest of the (1) Intraday Restrike Event Reference Day immediately preceding (i') in which case i(REF) is referred as (i'') and the latest Intraday Restrike Event Reference Time on such Intraday Restrike Event Reference Day is referred as (v1) (2) the Valuation Date which immediately precedes (i') in which case i(REF) is referred to as (i'-1).

LSLREF(i(REF))

means, if i(REF) is an Intraday Restrike Event Reference Day then $LSL(i'', v1)$; or otherwise $LSL(i'-1)$.

AdjPrice(i(REF))

means:

(1) if i(REF) is an Intraday Restrike Event Reference Day, then:

$$\text{AdjPrice}(i(REF)) = \text{Price}(i'', v1)$$

(2) or otherwise:

$$\text{AdjPrice}(i(REF)) = \text{Price}(i'-1)$$

$V_{REF}(v)$

means the latest Intraday Restrike Event Reference Time preceding, and excluding, Calculation Time(v).

5. PERFORMANCE OF FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT AND ASSOCIATED RISKS

The Warrants are designed to track the performance of the Leveraged Strategy, after taking into account deduction of the Commission, and through tracking the performance of the Leveraged Strategy, the Warrants provide a daily exposure to the Index. The exposure to the Index provided by the Warrants is amplified by the Leverage. Subject to taking into account certain factors (including notably the Commission), the Warrants are designed to multiply the daily performance of the Index by a factor (the Leverage) of 7 (except in limited circumstances, where an intra-day restrike of the Warrants may be triggered to offer some protection against an extreme decrease in the value of the Index).

If, for example, on any trading day the Index moves by 1 per cent. from its closing level on the previous trading day, the value of the Warrants, subject to certain factors (including notably the Commission), on such trading day will move by approximately 1 per cent. multiplied by the Leverage (+7). The higher the performance of the Index, the higher the return on the Warrants and, conversely, the lower the performance of the Index, the lower the return on the Warrants.

It is important to note that the exposure of the Warrants to the Index is re-set daily. This means that the performance of the Warrants with respect to any given trading day is based on how far the Index has risen or fallen from the level it closed at the trading day before. The next trading day, the process starts again from the new closing level of the Index. As a result, over periods of more than one day, movements in the Index are compounded and the performance of the Warrants will potentially deviate from seven times the actual performance of the Index over such period of time depending on the day to day performance of the Index during such period.

B.19 / B.4b	Known trends affecting the Guarantor and the industries in which it operates
	<p>The macroeconomic environment saw a gradual improvement in 2017. This improvement is expected to continue in 2018, with accelerated growth in most major economic areas and more dynamic international trade flows. The markets should remain buoyant, although valuation levels raise the question of their long-term sustainability, and a certain volatility could resurface. Lastly, the central banks should continue the normalisation of their monetary policies, albeit more gradually.</p> <p>In the Eurozone, growth should strengthen further in 2018, under the combined effect of the accommodative monetary and budgetary policies implemented, together with strong international demand.</p> <p>For 2018, the regulatory agenda should focus on the European legislative process concerning the set of CRR2/CRD5 texts, as well as the finalisation and harmonisation of the various liability ratio requirements (MREL – Minimum Required Eligible Liabilities, and TLAC – Total Loss Absorbing Capacity).</p> <p>The year 2018 will likely be marked by a highly uncertain geopolitical environment, following on from a certain number of events over the last two years. Important elections will be held in several European Union countries (in Italy, in particular), and the Brexit negotiations will continue. “Separatist” tensions (Catalonia) could further intensify. In addition, several areas of instability and tension could affect the global economy, whether in the Middle East or in Asia, with American policy currently being characterised by a certain unpredictability.</p> <p>In Europe, provided that the political situation in Germany and in Italy becomes clearer, 2018 could signal a new impetus in European ambition.</p> <p>Lastly, banks must continue to adapt to a certain number of fundamental shifts, especially the acceleration of technological changes, requiring them to radically transform their operational and relationship models.</p> <p>Within this framework, and in order to generate stronger, profitable and sustainable growth, the Group’s priorities in 2018 will be to:</p> <ul style="list-style-type: none"> • continue its growth by implementing a series of ambitious initiatives aimed at all its high-potential customers (corporates, professionals and high net worth customers, bank insurance, Boursorama, ALD, etc.), while developing segments and services tailored to their changing needs; • accelerate the digital transformation of all its businesses and functions, and in particular the digitalisation of its retail banking networks, both in France and abroad; • maintain strict control of its costs, risks and capital allocation; • continue its realignment via the disposal or closure of activities that do not have critical mass and/or do not generate synergies; continue to implement its Culture and Conduct programme, which aims to develop the Societe Generale culture by placing values, leadership quality and behavioural integrity at the very heart of the Group’s transformation, thereby building confidence among all its stakeholders (and mainly its customers).

The Guarantee constitutes a general and unsecured contractual obligation of the Guarantor and no other person, any payments on the Warrants are also dependent on the creditworthiness of the Guarantor.

The Guarantee is a payment guarantee only and not a guarantee of the performance by the relevant Issuer or any of its other obligations under the Warrants benefiting from the Guarantee.

The Guarantee may cover only part of the relevant Issuer's payment obligations under

	<p>the relevant issue of Warrants. In such a case, Warranholders may retain the risk that payments under the Guarantee are less than the amounts due by the Issuer under the Warrants.</p> <p>Société Générale will act as issuer under the programme relating to a warrants issuance programme (the Programme) pursuant to which each of Société Générale, SG Issuer, SGA Société Générale Acceptance N.V. and Société Générale Effekten GmbH may from time to time issue warrants, as the Guarantor of the Warrants issued by the Issuer and also as provider of hedging instruments to the Issuer. As a result, investors will be exposed not only to the credit risk of the Guarantor but also operational risks arising from the lack of independence of the Guarantor, in assuming its duties and obligations as the Guarantor and provider of the hedging instruments.</p> <p>The potential conflicts of interests and operational risks arising from such lack of independence are in part intended to be mitigated by the fact that different divisions within the Guarantor will be responsible for implementing the Guarantee and providing the hedging instruments and that each division is run as a separate operational unit, segregated by Chinese walls (information barriers) and run by different management teams.</p> <p>The Issuer and the Guarantor and any of their subsidiaries and/or their affiliates, in connection with their other business activities, may possess or acquire material information about the underlying assets. Such activities and information may cause consequences adverse to Warranholders.</p> <p>The Issuer and the Guarantor and any of their subsidiaries and/or their affiliates may act in other capacities with regard to the Warrants, such as market maker, calculation agent or agent. Therefore, a potential conflict of interests may arise.</p> <p>In connection with the offering of the Warrants, the Issuer and the Guarantor and/or their affiliates may enter into one or more hedging transaction(s) with respect to a reference asset(s) or related derivatives, which may affect the market price, liquidity or value of the Warrants.</p>
D.6	Important warning to the investor
	<p>The possibility of an optional early expiration by the Issuer, on a predetermined date, is likely to have a negative effect on the market value of the Warrants. Potential investors should consider the reinvestment risk in light of other investments available at the time of the early expiration. Furthermore, this optional early expiration at the only discretion of the Issuer could prevent the Warranholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.</p> <p>The terms and conditions of the Warrants may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Warrants may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying instrument(s), the terms and conditions of the Warrants allow the Issuer to substitute the underlying instrument(s) by new underlying instrument(s), cease the exposure to the underlying asset(s) and apply a reference rate to the proceeds so obtained until the expiration date of the Warrants, cancel the Warrants on the basis of the market value of these Warrants, or deduct from any due amount the increased cost of hedging, and in each case without the consent of the Warranholders.</p> <p>Payments (whether at expiration or otherwise) on the Warrants are calculated by reference to certain underlying(s), the return of the Warrants is based on changes in the value of the underlying(s), which may fluctuate. Potential investors should be aware that</p>

	<p>these Warrants may be volatile and that they may receive no return and may lose all or a substantial portion of their investment.</p> <p>During the lifetime of the Warrants, the market value of these Warrants may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.</p> <p>The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.</p>

B.19/ B.4b	Andamenti noti che influiscono sul Garante e sui settori in cui opera

	<p>Il contesto macroeconomico ha visto una graduale ripresa nel 2017. Tale ripresa dovrebbe continuare nel 2018 con una crescita accelerata nella maggior parte delle aree economiche e con flussi internazionali di scambi più dinamici. I mercati dovrebbero rimanere in espansione, anche se sulla base dei livelli di valutazione ci si interroga sulla sostenibilità nel lungo termine, e potrebbe riemergere una certa volatilità. Infine, le banche centrali dovrebbero continuare la normalizzazione delle loro politiche monetarie, sia pure più gradualmente.</p> <p>Nell'Eurozona, la crescita dovrebbe rafforzarsi ulteriormente nel 2018, per l'effetto combinato delle politiche monetarie e di bilancio accomodanti adottate, e di una forte domanda internazionale.</p> <p>Per il 2018, l'agenda normativa dovrebbe focalizzarsi sul processo legislativo europeo avente ad oggetto i testi CRR2/CRD5, nonché la finalizzazione e l'armonizzazione dei requisiti riguardanti i rapporti di passività (MREL – <i>Minimum Required Eligible Liabilities</i>, e TLAC – <i>Total Loss Absorbing Capacity</i>).</p> <p>Il 2018 sarà probabilmente caratterizzato da un ambiente geopolitico estremamente incerto, a seguito di una serie di eventi degli ultimi due anni. In diversi stati dell'Unione Europea si terranno delle importanti elezioni (in particolare in Italia) e proseguiranno i negoziati per la Brexit. Le tensioni "separatiste" (Catalogna) potrebbero ulteriormente intensificarsi. In aggiunta, diverse aree caratterizzate da instabilità e tensione potrebbero influenzare l'economia globale, sia in Medio Oriente che in Asia, con la politica americana attualmente caratterizzata da una certa imprevedibilità.</p> <p>In Europa, purché la situazione politica in Germania e in Italia si sia chiarita, il 2018 potrebbe segnare un nuovo slancio nelle ambizioni europee.</p> <p>Infine, le banche dovranno continuare ad adeguarsi ad un certo numero di cambiamenti fondamentali, specialmente l'accelerazione dei mutamenti tecnologici, che richiederanno di trasformare radicalmente i loro modelli operativi e di relazione.</p> <p>In questo contesto, e al fine di generare una crescita più forte, redditizia e sostenibile, le priorità del Gruppo per il 2018 saranno:</p> <ul style="list-style-type: none"> • continuare la propria crescita attuando una serie di ambiziose iniziative volte a tutti i clienti ad alto potenziale (società, professionisti, clienti dotati di grandi patrimoni, bancassurance, Boursorama, ALD, ecc.), sviluppando al contempo segmenti e servizi personalizzati alle loro mutate esigenze; • accelerare la trasformazione digitale di tutte le attività e funzioni e, in particolare, la digitalizzazione delle reti della banca al dettaglio, sia in Francia che all'estero; • mantenere uno stretto controllo dei costi, dei rischi e dell'allocazione del capitale; • continuare il proprio riassetto attraverso il disinvestimento o la chiusura delle attività che non hanno una massa critica e/o che non generano sinergie; • continuare ad adottare il proprio programma Cultura e Comportamenti (<i>Culture and Conduct</i>), che mira a sviluppare la cultura di Società Generale collocando i valori, la capacità di guida e l'integrità comportamentale al cuore della trasformazione del Gruppo, rafforzando conseguentemente la fiducia tra i propri azionisti (e principalmente tra i propri clienti).
B.19 / B.5	Descrizione del gruppo del Garante e della sua posizione all'interno di tale gruppo
	<p>Il Gruppo offre una vasta gamma di servizi di consulenza e soluzioni finanziarie ad hoc a singoli clienti, grandi investitori societari e istituzionali. Il Gruppo conta su tre attività di "core business" complementari:</p> <ul style="list-style-type: none"> • Retail Banking in Francia • Retail banking e servizi finanziari e assicurativi a livello internazionale; e • Corporate and Investment Banking, Private Banking, Asset and Wealth Management e Securities Services.

L'Agente di Calcolo può anche, in qualsiasi Data di Valutazione(i) da, ma escludendo, la Data di Valutazione Iniziale a, e includendo, la Data di Valutazione Finale, decidere a sua assoluta discrezione di adeguare il valore di Rapporto(i) rispetto a tale Data di Valutazione(i). Strategia a Leva

Descrizione della Strategia a Leva

La strategia a cui la performance del Warrant è collegata è la Strategia a Leva che consiste in un'esposizione a leva al Sottostante con un fattore di Leva "Leva" e un ipotetico strumento del mercato monetario.

L'esposizione nozionale della Strategia a Leva al Sottostante è rivista a ciascuna Data di Valutazione al fine di prendere in conto il Livello di Chiusura della Strategia a Leva della precedente Data di Valutazione, come da seguito descritto.

Salvo il verificarsi di un Evento di Restrike Infragiornaliero, (dopo il quale il Livello di Chiusura di Strategia a Leva sarà determinato in conformità con la Condizione 3.2.2.5.4 dei Termini e Condizioni Aggiuntivi relativi a One Delta, Fixed Leverage e Turbo Warrants) per ciascuna Data di Valutazione(i), il **Livello di Chiusura della Strategia a Leva** a tale Data di Valutazione(i) è calcolato in conformità con la formula seguente:

alla Data di Valutazione(0):

LSCL(0) = LSCLiniziale

a ciascuna Data di Valutazione(i) successiva:

LSCL(i) = $\text{Max}(\text{LSCL}(i-1) \times (1 + \text{Leva} \times ((\text{Prezzo}(i) / \text{AdjPrezzo}(i-1)) - 1) + (1-\text{Leva}) \times \text{Tasso}(i-1) \times \text{ACT}(i-1,i) / \text{GiorniBaseCalcoloTassi}), 0)$

Salvo il verificarsi di un Evento di Restrike Infragiornaliero (dopo il quale il Livello di Strategia a Leva sarà determinato in conformità con la Condizione 3.2.2.5.4 dei Termini e Condizioni Aggiuntivi relativi a One Delta, Fixed Leverage e Turbo Warrants), per ciascuna Data di Valutazione(i) e ciascuno Orario di Calcolo(v), il **Livello della Strategia a Leva** all'Orario di Calcolo(v) è calcolato in conformità con la formula seguente:

LSL(i,v) = $\text{Max}(\text{LSCL}(i-1) \times (1 + \text{Leva} \times ((\text{Prezzo}(i,v) / \text{AdjPrezzo}(i-1)) - 1) + (1-\text{Leva}) \times \text{Tasso}(i-1) \times \text{ACT}(i-1,i) / \text{GiorniBaseCalcoloTassi}), 0)$

Al fine di determinare LSCL(i) a una Data di Valutazione immediatamente successiva a un Giorno di Riferimento dell'Evento di Restrike Infragiornaliero, i riferimenti a (i-1) della formula LSCL(i) qui sopra si intenderanno come riferimenti a (i') (come determinato in conformità con la Condizione 3.2.2.5.4 dei Termini e Condizioni Aggiuntivi relativi a One Delta, Fixed Leverage e Turbo Warrants).

$\text{Prezzo}(i-1)$

TassoCash or **TassoCash(i)** indica, per ogni Data di Valutazione(i):

Descrizione Strategia Straordinaria di Adeguamento per Ragione di Performance

Descrizione

Se l'Agente di Calcolo determina che un Evento di Restrike Infragiornaliero si è verificato all'Orario di Calcolo(v) durante la Data di Valutazione(i), un aggiustamento (una **Strategia Straordinaria di Adeguamento per Ragione di Performance**) dovrà essere implementata durante tale Data di Valutazione(i) in conformità con le seguenti disposizioni.

Il calcolo in tempo reale della Strategia a Leva sarà sospeso durante il Periodo di Osservazione dell'Evento di Restrike Infragiornaliero e riprenderà in conformità con la Condizione 3.2.2.5.4 dei Termini e Condizioni Aggiuntivi relativi a One Delta, Fixed Leverage e Turbo Warrants entro i 15 minuti successivi alla fine di tale Periodo di Osservazione dell'Evento di Restrike Infragiornaliero (il punto di tale ripresa the sarà l'**Orario di Ripresa del Calcolo** ed il giorno in cui tale ripresa avviene sarà il **Giorno di Ripresa del Calcolo o CRD**). Se la fine del Periodo di Osservazione dell'Evento di Restrike Infragiornaliero avverrà meno di 15 minuti prima dell'Orario di Fixing nel Giorno di Riferimento dell'Evento di Restrike Infragiornaliero, l'Orario di Ripresa del Calcolo sarà l'Orario di Fixing che segue immediatamente la fine del Periodo di Osservazione dell'Evento di Restrike Infragiornaliero.

In ogni Giorno di Ripresa del Calcolo, dall'Orario di Ripresa del Calcolo, LSCL(CRD) e LSL(CRD,v) saranno determinati come segue:

Per ogni Orario di Calcolo(v) durante tale Giorno di Ripresa del Calcolo alla fine del Periodo di Osservazione dell'Evento di Restrike Infragiornaliero, la Strategia a Leva è calcolata in conformità con la seguente formula:

$$LSL(CRD,v) = LSL(i',V_{REF}(v)) \times (1 + Leva \times ((Prezzo(CRD,v) / AdjPrezzo(i')) - 1) + (1 - Leva) \times Tasso(i') \times ACT(i',CRD) / GiorniBaseCalcoloTassi)$$

e all'Orario di Fixing di tale Giorno di Ripresa del Calcolo:

$$LSCL(CRD) = LSL(i',V_{REF}(v)) \times (1 + Leva \times ((Prezzo(CRD) / AdjPrezzo(i')) - 1) + (1 - Leva) \times Tasso(i') \times ACT(i',CRD) / GiorniBaseCalcoloTassi)$$

Definizioni Specifiche

(i') indica il Giorno di Riferimento dell'Evento di Restrike Infragiornaliero che corrisponde all'Evento di Restrike Infragiornaliero immediatamente precedente all'Orario di Calcolo(v).

$$AdjPrezzo(i') = Prezzo(i',V_{REF}(v))$$

I Warrants possono essere esercitati anticipatamente a scelta dell'Emittente. I titolari dei Warrants potrebbero in queste circostanze vedersi assegnare l'Importo di Liquidazione Opzionale Anticipata che sarebbe un importo determinato così come sarebbe stato determinato l'Importo di Liquidazione per Contanti salvo che il "Prezzo di Liquidazione Finale" si intenderà determinato alla Data di Liquidazione Anticipata Opzionale (invece che alla data nella quale il Prezzo di Liquidazione Finale deve essere determinato in base ai Termini e Condizioni Aggiuntivi relativi a One Delta, Fixed Leverage e Turbo Warrants. che corrispondono al Riferimento del Prodotto).

C.19 Prezzo di esercizio o prezzo di riferimento finale del sottostante

Prezzo di Liquidazione Finale: il prezzo di riferimento finale del Warrant è il valore di apertura (opening price) (come definito nelle Additional Terms and Conditions for Index Linked Warrants) rilevato alla Data di Valutazione Finale.

La Garanzia costituisce un obbligo contrattuale generale e non garantito del Garante e di nessun altro soggetto, ed eventuali pagamenti relativi ai Warrants sono altresì legati al merito creditizio del Garante.

La Garanzia è unicamente una garanzia di pagamento e non garantisce l'adempimento da parte del relativo Emittente ovvero il rispetto degli altri obblighi allo stesso spettanti in virtù dei Warrants che beneficiano della Garanzia.

La Garanzia potrebbe coprire solo parzialmente gli obblighi di pagamento spettanti al relativo Emittente in virtù della relativa Emissione di Warrants. In tal caso, i titolari dei Warrants potranno essere esposti al rischio che gli importi versati in virtù della Garanzia siano inferiori rispetto alle somme dovute dall'Emittente ai sensi dei Warrants.

Société Générale agirà in qualità di emittente ai sensi del programma di emissione dei warrants (il **Programma**), in virtù del quale ciascuna tra Société Générale, SG Issuer, SGA Société Générale Acceptance N.V. e Société Générale Effekten GmbH potranno di volta in volta, emettere warrants, in qualità di Garante dei Warrants emessi dall'Emittente e anche in qualità di provider degli strumenti di copertura all'Emittente. Ne consegue che gli investitori saranno esposti non solo al rischio di credito del Garante, ma anche ai rischi operativi derivanti dalla posizione non indipendente del Garante nell'assumersi i doveri e gli obblighi di Garante e di provider degli strumenti di copertura.

I potenziali conflitti di interesse e rischi operativi derivanti da tale mancanza di autonomia sono in parte mitigati dal fatto che la responsabilità di implementare la Garanzia e di fornire gli strumenti di copertura sarà affidata a diverse divisioni all'interno del Garante, e ciascuna divisione è gestita

	<p>come un'unità operativa indipendente, con barriere allo scambio di informazioni ("Chinese walls") e sotto la supervisione di team di gestione differenti.</p> <p>L'Emittente e il Garante e qualsivoglia delle loro controllate e/o Collegate potranno, nell'ambito delle altre attività aziendali, detenere o acquisire informazioni significative in merito agli attivi sottostanti. Tali attività e informazioni potrebbero influenzare negativamente i titolari dei Warrants.</p> <p>L'Emittente e il Garante e qualsivoglia delle loro controllate e/o Collegate potranno rivestire altri ruoli in relazione ai Warrants, quali ad esempio <i>market maker</i>, agente di calcolo o rappresentante. Potrebbe quindi verificarsi un potenziale conflitto di interessi.</p> <p>Nell'ambito dell'offerta dei Warrants, l'Emittente e il Garante e/o le loro Collegate potranno effettuare una o più operazioni di copertura in relazione all'(agli) attivo(i) di riferimento o ai relativi derivati, che potrebbero influire sul prezzo di mercato, sulla liquidità o sul valore dei Warrants.</p>
D.6	Avvertenze importanti per l'investitore
	<p>L'eventualità di una scadenza anticipata facoltativa decisa dall'Emittente, ad una data prestabilita, potrà presumibilmente avere un impatto negativo sul valore di mercato dei Warrants. I potenziali investitori dovranno tenere in considerazione il rischio di reinvestimento alla luce degli altri investimenti disponibili alla scadenza anticipata. Inoltre, tale scadenza anticipata facoltativa a totale discrezione dell'Emittente potrebbe impedire ai titolari dei Warrants di beneficiare dell'andamento dello(gli) strumento(i) sottostante(i) per l'intero periodo inizialmente previsto.</p> <p>In base ai termini e alle condizioni dei Warrants, al verificarsi di talune turbative di mercato potrebbero subentrare dei ritardi nella liquidazione dei Warrants ovvero si potrebbero rendere necessarie alcune modifiche. Inoltre, al verificarsi di eventi che hanno un impatto sullo(gli) strumento(i) sottostante(i), i termini e le condizioni dei Warrants consentono all'Emittente di sostituire lo(gli) strumento(i) sottostante(i) con (un) nuovo(i) strumento(i) sottostante(i), terminare l'esposizione all'(agli) attivo(i) sottostante(i) e applicare un tasso di riferimento ai proventi così ottenuti fino alla data di scadenza dei Warrants, annullare i Warrants in base al valore di mercato degli stessi ovvero detrarre da qualsivoglia importo dovuto il costo aggiuntivo di copertura, in ciascun caso senza il consenso dei titolari dei Warrants.</p> <p>I pagamenti (siano essi alla scadenza o in altra data) relativi ai Warrants sono calcolati in riferimento a (un) determinato(i) sottostante(i), il rendimento dei Warrants è basato sulle variazioni nel valore del(i) sottostante(i), soggetto ad oscillazioni. I potenziali investitori dovranno tener conto del fatto che tali Warrants potrebbero essere soggetti a volatilità, che gli investitori stessi potrebbero non ottenere alcun rendimento e che potrebbero perdere l'intero importo investito ovvero una parte significativa dello stesso.</p> <p>Durante il periodo di validità dei Warrants, il valore di mercato degli stessi potrà essere inferiore rispetto al capitale investito. Inoltre, l'eventuale insolvenza dell'Emittente e/o del Garante potrebbe comportare la perdita totale del capitale investito.</p> <p>Si fa presente che gli investitori potrebbero andare incontro ad una perdita totale o parziale del loro investimento.</p>
